### Market Value Adjustment

Any amounts payable that are assessed a surrender charge will also be subject to a Market Value Adjustment ("MVA"), which may increase or decrease the amount payable. The MVA generally increases the contract withdrawal value when interest rates fall, and decreases the contract withdrawal value when interest rates rise. The MVA is not applied a) at the end of the surrender charge period; b) to penalty-free withdrawals; c) to the death benefit at the death of the owner; or d) to any settlement option after the 5th contract year with the payments being made over at least 5 years. (The MVA is not applicable in CA)

### Death Benefit

All surrender charges are waived upon death of the Owner (or first Joint Owner).

### Minimum Guaranteed Contract Value

Minimum Guaranteed Contract Value (MGCV) is equal to 87.5% of premium, less withdrawals, accumulated at the non-forfeiture interest rate.
